SUMMARY

A Web Developer with about three years of experience, I bring a blend of technical expertise, creativity, and a strong commitment to delivering exceptional digital solutions. With a solid foundation in programming languages such as HTML, CSS, JavaScript, and React I have developed and improved my skills in building responsive and user-friendly websites that captivate audiences and drive engagement.

WORK EXPERIENCE

FRONTEND DEVELOPER

Zidio Web Development

January 2024 – April 2024

REMOTE

- Collaborate with designers to translate wireframes and mockups into interactive and visually stunning UI components using HTML, CSS, and JavaScript frameworks like React or Angular.
- Wrote clean, maintainable, and modular code for frontend components, ensuring cross-browser compatibility and responsiveness across various devices and screen sizes.
- Integrate frontend components with backend services and APIs to fetch and display dynamic data, such as user profiles, tasks, projects, and notifications.
- Use version control systems like Git to manage codebase changes, collaborate with team members, and ensure code integrity and version control best practices.
- Work closely with backend developers, designers, and product managers to understand requirements, provide feedback, and iteratively improve the frontend of the application.
- Ensure that the application adheres to accessibility standards to make it usable by people with disabilities, including proper semantic HTML, ARIA attributes, and keyboard navigation.

PROJECTS

E-COMMERCE WEBSITE

- Developed and launched a fully functional e-commerce website from conception to implementation, utilizing HTML, CSS, and JavaScript for frontend development.
- Utilized Node.js and Express.js for backend development, incorporating MongoDB for database management.
- Implemented secure payment gateways, integrating user-friendly interfaces using libraries like React.js & Vue.js for seamless customer transactions.
- Collaborated with cross-functional teams including designers and marketers to ensure alignment with business goals and brand identity.
- Continuously monitored website functionality and implemented updates using tools like Git for version control, ensuring optimal performance and security.

REAL ESTATE WEBSITE

- Designed and developed a responsive real estate website, leveraging HTML, CSS, and JavaScript for frontend development to ensure compatibility across various devices and screen sizes.
- Utilized PHP and MySQL for backend development, implementing dynamic features such as property listings, search functionalities, and user authentication.
- Integrated Google Maps API to provide interactive mapping features, enabling users to explore property locations seamlessly.
- Collaborated with real estate agents and stakeholders to understand requirements and incorporate industry-specific features such as property details, amenities, and virtual tours.
- Regularly monitored website performance using tools like Google PageSpeed Insights and optimized code and assets for fast loading speeds and improved user experience.

EASY BANKING WEBSITE

- Developed an intuitive Easy Banking Landing Page using HTML, CSS, and JavaScript, focusing on user-friendly design and navigation to facilitate seamless interaction.
- Utilized PHP for backend functionalities such as form submission and data processing, ensuring smooth communication between the frontend and backend.
- Integrated responsive design principles and frameworks like Bootstrap to ensure optimal viewing experience across a variety of devices, including desktops, tablets, and smartphones.
- Implemented interactive elements such as animated sliders, hover effects, and collapsible menus to enhance user engagement and ease of use.
- Incorporated secure login features and encrypted data transmission protocols to protect user information and ensure privacy.
- Collaborated closely with stakeholders to gather requirements and incorporate branding elements, ensuring alignment with the bank's visual identity and messaging.
- Performed regular testing and optimization to enhance website performance, including load times and responsiveness, for a seamless user experience.

LORUKI WEBSITE

- Developed and deployed the Loruki Website showcasing proficiency in frontend technologies such as HTML, CSS and JavaScript.
- Utilized responsive design principles and frameworks like Bootstrap to ensure compatibility across various devices and screen sizes.
- Implemented dynamic features and interactive elements using JavaScript to enhance user engagement and experience.

- Integrated backend technologies like Node.js and PHP for server-side functionalities such as form submission and data processing.
- Incorporated secure authentication mechanisms and encrypted data transmission protocols to protect user information.
- Collaborated with designers and stakeholders to ensure alignment with branding guidelines and user experience goals.
- Performed regular testing and debugging to maintain website functionality and optimize performance.
- Continuously monitored website analytics and user feedback to make data-driven improvements and enhancements.

EDUCATION

LAGOS STATE UNIVERSITY.

LAGOS NIGERIA.

Bsc. in Mechanical Engineering

SKILLS & ABILITIES

- Programming Languages: Proficient in HTML, CSS, JavaScript, and backend languages such as Python, PHP, & Node.js.
- Frontend Frameworks/Libraries: Experienced with React.js, Angular, & Vue.js for building interactive user interfaces.
- Backend Frameworks: Familiarity with Express.js, Django, Flask, & Ruby on Rails for server-side development.
- Web Development Tools: Skilled in using version control systems like Git.
- Problem-Solving: Strong problem-solving skills and ability to debug and troubleshoot issues efficiently.
- Communication: Effective communication skills for collaborating with designers, stakeholders, and team members
- Ability to work in cross functional Environments
- Time Management
- Continuous Learning: Commitment to continuous learning and staying updated with the latest web technologies and trends

ACTIVITIES AND INTERESTS

- Open Source Contribution: I actively contribute code to open-source projects, collaborating with developers globally to enhance software functionality and drive innovation within the community.
- Coding Challenges and Hackathons: I always Participate in coding challenges and hackathons, consistently demonstrating problem-solving abilities, creativity and teamwork skills to deliver high-quality solutions within tight deadlines.
- Continued Learning: I engage in ongoing professional development by attending workshops, online courses and tech conferences to stay abreast of the latest trends, tools and best practices in web development.

- **Personal Projects:** I initiate and execute personal web development projects, showcasing a proactive approach to skill development, creativity and the ability to translate ideas into functional digital solutions.
- **Tech Communities:** I actively participate in tech communities, meetups and online forums fostering meaningful connections with industry peers, sharing knowledge and staying engaged with the broader web development ecosystem.
- **Blogs and Technical Writing:** I publish insightful blogs and articles on web development topics demonstrating strong communication skills, a deep understanding of technical concepts and the ability to articulate complex ideas for diverse audiences.
- **Volunteer Work:** I volunteer web development services for non-profit organizations and community projects, leveraging technical expertise to make a positive impact on society while honing project management and client interaction skills.
